- ✓ Team player
- ✓ React
- ✓ Java
- ✓ Problem solving
- ✓ Strong verbal and written communication

EDUCATION

2024 - 2026 | Red Deer Polytechnic

Computer Programming Diploma

2019 - 2023 | University of Alberta

Bachelor of Science - Physics

WORK EXPERIENCE

Software Engineering Intern | Red Deer Polytechnic | May 2025 - Aug 2025

- Performed the role of a junior developer within a team to develop and deploy web applications and firmware solutions for the Department of Applied Research.
- Used React for front-end development of a real-time mobile app, which was used as a form of skill-based matchmaking for businesses and service providers in a live setting.
- Used Electron to develop a React desktop app with the purpose of providing data access to institutional researchers in the form of a responsive dashboard.
- Wrote firmware controls using Arduino and C++ to develop automated controls for a USB camera for implementation into a hockey faceoff training machine.
- Worked continually in a team of three people, collaborating using GitHub and following Agile development workflow. Met frequently with external stakeholders to discuss and scope out project details.

Inventory Analyst | Fountain Tire | July 2023 - July 2024

- Performed statistical analyses to control the flow of inventory as well as generated forecasts to predict customer demand.
 - Utilized Microsoft Excel and SQL on a daily basis to query data and perform data analysis while simultaneously adapting and improving existing processes through the automation of ordering strategies.
 - Applied principles of supply chain management, collaborating with vendors and customers to facilitate efficient delivery of product.
 - Compiled relevant data to present to superiors in various meetings related to business operations such as finance and budgets, logistics, and vendor collaboration.
-
